

Good and Bad evidence: the truth and lies of 9/11
www.oilempire.us

The idea that 9/11 was the result of government incompetence is easy to believe, but there is not any credible evidence for that conclusion.

9/11 was deliberately allowed to happen, given crucial technical assistance to ensure that it succeeded, and played on US fears of revenge for our wars.

The World Trade Center was bombed in 1993 by Egyptian Islamic radicals (an FBI informant in the group warned the FBI it was going to happen).

In 1995, "Jihadists" were caught in the Philippines planning Operation Bojinka, a plot to hijack 12 planes simultaneously, crashing some into buildings.

In 1998, Osama bin Laden issued a "fatwa" (religious edict) urging Muslims everywhere to kill as many Americans as possible.

al-Qaeda is a loose confederation of Islamic radicals in dozens of countries, some of them are veterans of the CIA proxy war against the Soviet Union in the 1980s in Afghanistan.

It is believable that some groups are motivated to attack the US in revenge for US wars in the Middle East and support for Israel, but those groups did not run the "9/11 war games."

George W. Bush read "The Pet Goat" while the towers burned, acting unsurprised and indifferent to the attacks. Massive stock trades betting that the value of United and American would decline were made the week before 9/11 (the CIA monitors these trades in real time).

Warnings about 9/11 -- what, when, how -- came from at least 15 countries.

Several political, military and corporate leaders were warned not to fly or to get out of the way. oilempire.us/warnings.html

Multiple FBI investigations of the "terrorists" at the flight schools were blocked, according to FBI whistle-blowers.

It is likely that remote control technology was used to fly Flight 77 in a 270 degree spiral around the Pentagon into the nearly empty, recently reconstructed and strengthened sector, which minimized casualties. www.oilempire.us/remote.html

The anthrax attacks on the media and the Democratic leadership in the Senate (when Congress was considering the "Patriot Act") came from an Army laboratory, not Islamic terrorists. www.freefromterror.net

Evidence in between "allowed to happen" and "inside job" (a hybrid scenario)

The inadequate response of the Air Force to the hijacked planes. www.oilempire.us/standdown.html
 The WAR GAMES that paralyzed the Air Force response. www.oilempire.us/wargames.html
 The "hijack the hijackers" theory (remote control technology) www.oilempire.us/understanding.html

9/11 was not a surprise attack!

US Incompetence not US conspiracy

The 9/11 Commission claims there was a wall between FBI and CIA that prevented close coordination, although in reality, they worked well together on counter-terrorism cases.

Fake evidence was planted about the hijackers, including the "magic passport" that supposedly passed through the fireballs to land on the streets of New York.

The 9/11 Commission blamed the FAA for screwing up the response to the hijackings, yet FAA safely landed more than 4,000 planes at airports that were not expecting them immediately after the attacks began. **FAA is not responsible for the Air Force's inaction.**

Blowback: 9/11 was revenge for US foreign policy

Most liberal / left "alternative" media claim that 9/11 was "blowback" -- retaliation for our violent foreign policy, (Bush said that the reason 9/11 happened is they hate our freedoms).

The "left gatekeepers" who attack writers who have proven 9/11 was allowed to happen include David Corn (The Nation), Alexander Cockburn, Norman Solomon and Chip Berlet.

Michael Moore's film *Fahrenheit 9/11* did not discuss the evidence for Bush administration foreknowledge, or that their "Project for a New American Century" needed a "new Pearl Harbor."

Professor Ward Churchill, under attack from right wingers for promoting the "blowback" theory and saying that 9/11 victims were imperialists, argues the view that 9/11 was an inside job is racist, implying that Arabs are incapable of attacking US interests. **His view ignores the role of the 9/11 war games.**

was 9/11 a surprise attack?

9/11 was allowed to happen (like Pearl Harbor)

No one seems interested in making hoaxes to suggest the Bush regime knew about 9/11 and merely let it happen. The disinformation suggesting complicity is nearly all at the far edge of the spectrum, using faked images and other bogus evidence to suggest that the 9/11 operation was an inside job.

About half of the 9/11 websites that claim to have proof about 9/11 complicity promote claims that are not true -- some of these sites are incompetent, others deliberately promote nonsense. Most of the liars make sure to include enough real material to establish their bona fides before lying.

The REAL evidence that 9/11 was an inside job is hard to find due to loud liars offering phony evidence used to distract (and discredit) 9/11 skeptics. The growing flood of fake claims for complicity is evidence of a sophisticated psychological warfare effort to cover the tracks of the conspiracy.

Reichstag Fire: 9/11 was an inside job

history of "No Planes on 9/11" hoaxes: www.oilempire.us/bogus.html

-- **Pentagon: the most popular and important hoax -- hundreds of eyewitnesses and the physical evidence disprove this claim.** www.oilempire.us/pentagon.html
 -- **North Tower** the most ridiculous hoax is the "webfairy" claim the North Tower was hit by a missile masked by a King Kong sized hologram of a plane.
 -- **pod plane** claim that Flight 175, which hit South Tower, had a missile-firing "pod" under it -- the "pod" is just a shaded photo of the normal bulge between the wings www.oilempire.us/pod.html It was promoted by the film "9/11: In Plane Site" www.oilempire.us/inplanesite.html
 -- **Pennsylvania** the neo-Nazi "American Free Press" claims that there was not a plane crash in Pennsylvania.

False claims regarding **demolition** are refuted at www.oilempire.us/demolition.html www.911review.com and <http://911research.wtc7.net>

Claims that **cell phone calls** to relatives of plane victims were faked alienate the victims families from the skeptics.
